Include a digital photo of the PC and OS. A top paragraph explaining the issue and how it affects your Windows installation. I've been having trouble installing MicroStation 11.5.1 on my Windows 8.1 laptop. I made no changes to the original install or registry. When I go to install MicroStation, it says: "Microsoft.Net Framework 4.5.2 is required. Microsoft.Net Framework 4.5.2 is currently not installed on this computer. You can install this application by downloading the.NET Framework 4.5.2 Setup, or by contacting the software publisher. " I have unzipped the Zipped and extracted all it to the C:\Users\Default folder and also to the default.net folder in the same directory. I have uninstalled.Net 4.6.1 on my Windows 8.1, but it still does not work. I am new to unzipping and installing the.Net Framework. If anyone could help and/or point me in the direction of a good article on installing.Net Framework 4.5.2. I would appreciate it greatly. A: Install VSTS.NET Framework 4.5.2 SDK A: A lot of users, including myself, have had the same problem and only seemed to be able to figure it out through trial and error. I found that the best way to install the.NET framework is by: Downgrading to.NET Framework 4.5.1 (best download from previous version of windows 8) Installing Visual Studio 2012 Installing.NET Framework 4.5.2 SDK The SDK is installed in C:\Program Files

(x86)\Microsoft Visual Studio 11.0. Installing the SDK may be enough for a lot of people but I still had 570a42141b
