

Directx 9 Shader Model 3.0 Free Download

There are no Shader Model 3.0 installers available for download. Because the 3.0 share model or pixel shader depends on your graphics card. Some video cards ... (non-Nvidia) have their own shader versions for 3D graphics. They are called DirectX, OpenGL or DirectDraw. Some of these commands, such as shader_x_fill, are already included in Shader Model 3.0. Others (such as shader_move_y) only work with DirectX. This means they are not built into Shader Model 3.0. Therefore, if you use them, then Shader Model 3.0 will not be compatible with the 3D for which they are used.
