
Here is my post. Kindly tell me how can I debug this problem. A: The issue was on the request which were requested by the Android emulator. Emucr-psxname-20090417-7z. ERROR: No such file or directory Unable to locate packaged inside android.jar Some 48 hours after Elon Musk's Tesla suspended deliveries of its Model 3 at its factory in Fremont, California, and in the wake of an FAA investigation and critical tweets from Donald Trump, the luxury electric car manufacturer is pushing forward, even as its board of directors had indicated at a call with investors that it is considering other options. Until a few hours ago, Musk said in a Twitter post that the company is charging \$7,000 for "reservation deposit" for its US-bound vehicles. "You are seriously not understanding how much you don't know about basic economics," he continued. "Consumers not wanting Model 3 is why it is priced so low! Demand is so high that it is hard to get reservations right now." In an email to Quartz, Tesla said: "We have received clarification from our attorneys that our tweet was misunderstood, and therefore not in violation of any contractual requirement. We do have liability insurance in case anything goes sideways." It then added, "We can use all the confusion that gives us. That's all." Musk's explanation did not sit well with some investors, 570a42141b
