**Johannes Itten Arte Del Colore Pdf 23**

Among all the writers on color that I have read in preparing this book, I am especially indebted to the work of Albert Munsell, Johannes Itten, Enid Verity, Gale Mankin, Christopher Wren, John Coleman, Daniel Dennett, Martin Heidegger, Christoph Murnau, Egon Schiele, and Delisle Cooper. "The most important thing about color," said Rainer Werner Fassbinder, "is that it is not important enough on its own." It was the same with these photographs. I had to make them one by one for this book. I did not make them for beauty, although I achieved some success in this respect. I wanted to show my attitude to photography and how I perceive it. This is by no means a scientific book, it does not attempt to prove theoretical positions. I just want to share my thoughts. In any case, that's how it seems to me. This is not a textbook, because in any textbook it is not inscribed how to get a good result. This is a photograph, but not only, but the whole world. Just a few photos in which I tried to express my attitude. In my opinion, this is the most important book I have written since my mind blowing articles on color and photography - it is not for the technical side of photography, not even for academic standards, although sometimes I had to go for it. No, the fact is that this is a book about the attitude of a photographer to his work. In essence, in it I described what I still lacked on television - one more opinion that cannot be "cut off", as TV people like to do.
